

《Face shield V7》 HEAD SHIELD

Face shield is a product that protects your face from scattered viruses. It has good transparency and can be used repeatedly as it can be sterilized with a commercially available alcohol sterilization sheet. The urethane material holds down the forehead so it won't hurt even when used for a long time. 1mm acrylic is used to make it harder and more stable.

[Assembled size] W200 x H260 x D85 (mm)

[Material] Acrylic 1mm used

[Price] 10 pieces per 17,500 yen (tax included)

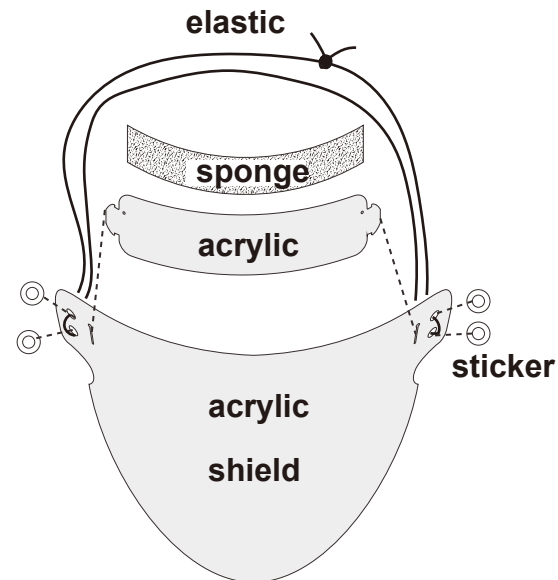

Kit (not assembled), shipping fee and packing fee included

[Payment method] cash on delivery only

[Estimated delivery] Ships sequentially from April 27th

[Remark] Ships with urethane parts attached to the forehead.

There is also a face shield V8 using a 0.5 mm thick PET plate.

*Specifications may change without notice.
please confirm.*

- * Please remove the protective film on the back and front before use.
- * This product is not made for medical use.
- * Because it is lightweight, it uses a thin material, so it may crack if strong force is applied.
- * Sponge and rubber may discolor.
- * For cleaning, wipe face shield after squeezing a soft cloth containing water or a neutral detergent firmly and wipe it. Do not use alcohol.
- * If you wipe it off strongly, you may get scratches.
- * It may be deformed by heat such as high temperature.
- * Procurement of materials is currently difficult, and specifications may change without notice.

Developed and manufactured by Miyuki Co., Ltd., an acrylic processing factory
